

📊 Call Center Data Analysis Dashboard

Project Overview

This project analyzes call center operational data using Microsoft Excel. The objective was to evaluate customer interactions, representative performance, customer satisfaction, and revenue generation through data-driven analysis and dashboard reporting.

Business Problem

Call centers generate large volumes of customer interaction data. Management requires a clear understanding of operational performance, customer satisfaction levels, and representative productivity to make informed business decisions.

Dataset Information

The dataset contains 1,000 customer call records with information such as:

- Customer ID
 - Representative ID
 - Call Duration
 - Purchase Amount
 - Customer Rating
 - Gender
 - City
 - Date & Time
-

Tools Used

- Microsoft Excel
 - Pivot Tables
 - Pivot Charts
 - KPI Cards
 - Slicers
 - Conditional Formatting
-

Data Cleaning Process

- Removed duplicate records
 - Validated data types
 - Standardized categorical values
 - Verified rating and revenue fields
 - Prepared data for analysis
-

Key Performance Indicators (KPIs)

- Total Calls Received
 - Total Revenue Generated
 - Total Call Duration
 - Average Customer Rating
 - Top Performing Representative
 - Customer Satisfaction Rate
-

Dashboard Features

- Interactive KPI Cards
 - Representative Performance Analysis
 - Customer Satisfaction Analysis
 - Day-wise Call Volume Trends
 - City-wise Customer Analysis
 - Dynamic Filtering using Slicers
-

Key Insights

- Representative R02 handled the highest call volume.
 - Representative R03 generated the highest revenue.
 - Saturday recorded the highest call traffic.
 - More than 30% of customers provided a 5-star rating.
 - Customer satisfaction remained above target benchmarks.
-

Business Recommendations

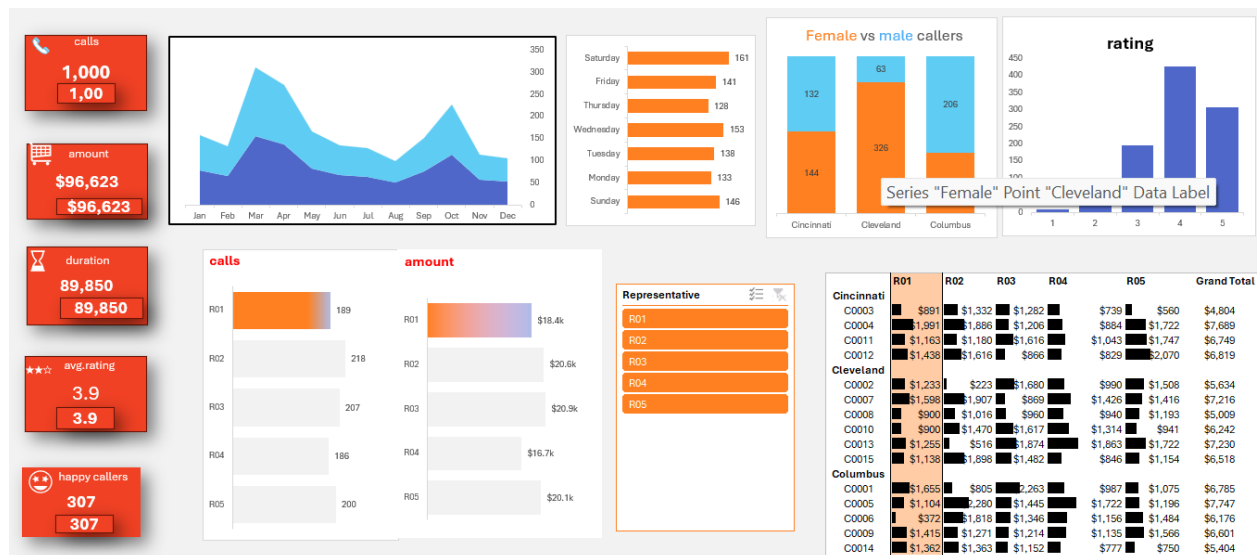

- Increase staffing during peak call-volume periods.
- Implement workload balancing among representatives.
- Provide targeted coaching for lower-performing representatives.

- Continue monitoring customer satisfaction metrics.

Skills Demonstrated

- Data Cleaning
- Exploratory Data Analysis (EDA)
- Dashboard Development
- KPI Reporting
- Data Visualization
- Business Intelligence
- Data Storytelling
